The Earth Needs You— Join Our Team

Volunteers for Soil and Water Conservation

So you're interested in joining the Earth Team. . .

Great! We need your help in reducing soil erosion, conserving our water and improving its quality, and developing pride in our country's natural resource heritage. Your commitment to the Earth Team will help ensure that generations to come will enjoy America's bounty.

The Earth Team, the volunteer arm of the U.S. Department of Agriculture's Soil Conservation Service (SCS), is now recruiting volunteers in more than 3,000 locations across the country. Make a difference in your community—become an Earth Team volunteer.

As an Earth Team volunteer, you'll work with professionals on conservation activities in your community. Whatever your talents or interests, there is a volunteer opportunity for you. Technical assistance is needed to plan, lay out, and design conservation practices; to make natural resource inventories; and to improve wildlife habitat. Schools and community groups benefit from the conservation tours and exhibits that volunteers can organize. Taking photographs, writing articles, speaking to community groups, and producing artwork and publications are some of the

opportunities available. Office support services include opportunities in computer data entry, typing, filing, computer programming, and conservation information. There are opportunities for everyone.

Who Can Volunteer

Anyone 16 years of age or older and interested in conserving our precious natural resources can join the Earth Team. You can work part time or full time,

As an Earth Team volunteer, you'll work with professionals on conservation activities in your community. Whatever your talents or interests, there is a volunteer opportunity for you. Technical assistance is needed to plan, lay out, and design conservation practices; to make natural resource inventories; and to improve wildlife habitat. Schools and community groups benefit from the conservation tours and exhibits that volunteers can organize. Taking photographs, writing articles, speaking to community groups, and producing artwork and publications are some of the

opportunities available. Office support services include opportunities in computer data entry, typing, filing, computer programming, and conservation information. There are opportunities for everyone.

Who Can Volunteer

Anyone 16 years of age or older and interested in conserving our precious natural resources can join the Earth Team. You can work part time or full time,

evenings or weekends, outdoors or in a local SCS office.

Why Volunteer for the Earth Team

As a member of the Earth Team, you'll be involved in conservation at the action level—helping farmers, ranchers, and other landowners reduce wind and water erosion, keep streams clear, conserve water, enhance wildlife habitat, and reduce upstream flooding.

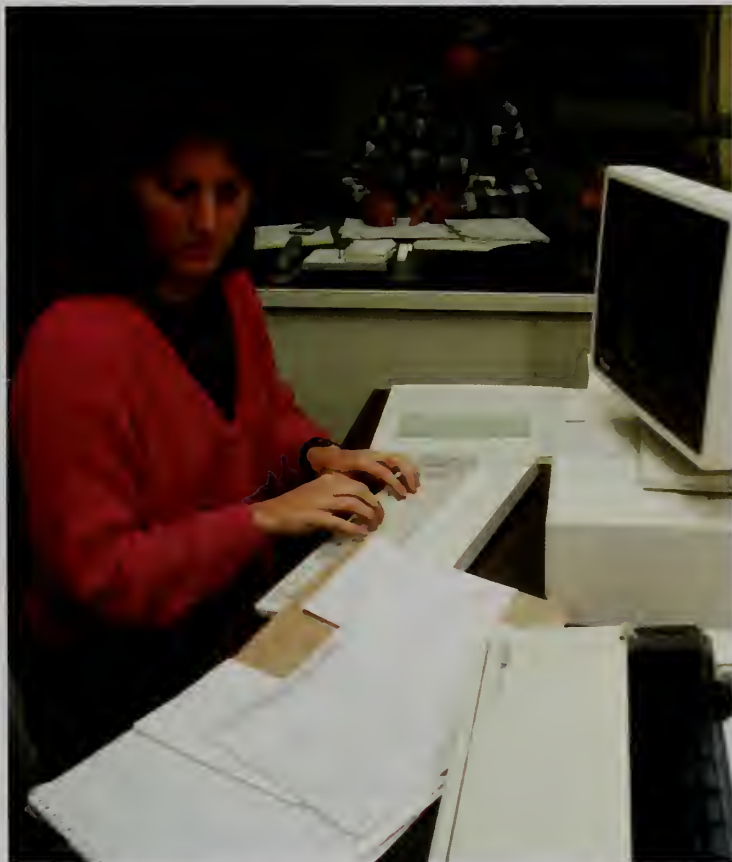

You also will have many opportunities to gain professional work experience, and you may discover a lifetime career. You may earn academic credit while working with the Earth Team.

Earth Team volunteers help carry the message of resource conservation to schools.

Volunteers help SCS and districts respond to the planning needs of farmers, ranchers, and other land users.

Volunteers in SCS offices provide important clerical help that includes data entry, taking phone calls, and greeting visitors.

Where Volunteers Can Help

On the Land—with professional conservationists who are working directly with farmers and ranchers.

In schools—with high school, college, and university students. Through camps and classes, you can introduce young people to the wonders of nature.

With organizations—youth groups, professional societies, or civic groups. All types of organizations are joining together to sponsor water quality education campaigns, community beautification, and erosion control projects. Cooperative Earth Team efforts can help solve many natural resource problems in your area.

In offices—where SCS or your conservation district may want to use your talents for clerical assistance, organizing information in a computer, preparing newsletters, or educating others about natural resource conservation.

How to Volunteer

It's easy to join the Earth Team. Here's what you do: Contact the Volunteer Coordinator in your State, the address of which appears on the back of this brochure. Let the coordinator know that you're interested in joining the Earth Team.

You may want to call your local Soil Conservation Service office directly. Your interest and skills will be matched with the projects that need to be done in your community.

Give a gift to future generations—join the Earth Team. Together we can preserve America's bounty.
